

Summer Undergraduate Research Program

Thomas Jefferson University is an internationally recognized academic health center with biomedical research programs providing a wide variety of opportunities for student research training. Jefferson Graduate School of Biomedical Sciences offers academic programs leading to the MS and PhD degrees in a variety of biomedical areas.

For more information or to apply, go to:

http://www.jefferson.edu/university/biomedical_sciences/admissions/apply-to/summer-undergraduate-research.html

In an effort to acquaint you with our academic programs and areas of ongoing research, Jefferson Graduate School of Biomedical Sciences sponsors summer research positions that provide opportunities for upper-level undergraduate students (**those who have completed their junior year**), to work in the laboratories of active faculty researchers. The program is designed to provide a rich experience for those students interested in pursuing their graduate studies in the biomedical sciences.

Highlights of the Program Include

- A stipend of \$3,500 and an allowance for campus housing
- A ten-week research experience from June 1st through August 7th, 2015
- Research experience with world-renowned faculty whose research areas include:
 - Biochemistry & Molecular Pharmacology
 - Cell & Developmental Biology
 - Genetics, Genomics & Cancer Biology
- Immunology & Microbial Pathogenesis
- Neuroscience
- Tissue Engineering & Regenerative Medicine

Application deadline of Monday, February 2, 2015.
