

These funds are for students in EPA (Environmental Protection Agency) fields listed below.

Eligibility: “The GRO Undergraduate Fellowship is intended for students entering their last two years of study before obtaining a bachelor’s degree. Applicants attending fully accredited four year U.S. institutions of higher education are eligible to apply. These schools must be among those that are not highly funded for development of environmental research capacity. For the purposes of this solicitation, EPA considers as **ineligible** those institutions receiving more than \$35 million in annual federal research and development funding.” So students heading for UNM and NMSU couldn’t apply, but anyone at Tech and others could – I looked up their research funding.

Deadline Dec. 10: EPA Announces Grants for Undergraduate Quality Environmental Education

The EPA is making available 30 grants of \$46,500 each to enhance and support quality environmental education for undergraduates. The hope is that this assistance will encourage more students to continue their education beyond the baccalaureate level and pursue careers in environmentally related fields. Students at an accredited college or university are eligible. The deadline is December 10. The fellowships are intended to help defray costs associated with environmentally oriented study leading to a bachelor’s degree and are funded in these fields of study:

- Natural and Life Sciences (Funding Opportunity Number: EPA-F2009U-GRO-P1).
- Environmental Science and Interdisciplinary (Funding Opportunity Number: EPA-F2009U-GRO-P2).
- Engineering (Funding Opportunity Number: EPA-F2009U-GRO-P3).
- Social Sciences and Decision Making (Funding Opportunity Number: EPA-F2009U-GRO-P4).
- Physical Sciences (Funding Opportunity Number: EPA-F2009U-GRO-Q1).
- Mathematics and Computer Science (Funding Opportunity Number: EPA-F2009U-GRO-Q2).
