

Explore Your "Fit" as a Researcher @ P&G

# Research Your Future in Science

A Seminar to Discover your R&D Career at P&G

Research and Development (R&D) is the magic behind our brands and what we do. It is a unique and multifaceted function ranging from specialized Researcher roles to consumer products research. To explore these opportunities and gain insight on how your degree can be utilized as an intern or P&G Researcher, we encourage YOU to participate in the *P&G Research and Development Research Your Future in Science Seminar*.

## The Science Seminar offers:

- 3-4 days of R&D career exploration at P&G in Cincinnati, Ohio; all expenses including travel paid.
- Hands-on experimentation, tours, and presentations at P&G technical facilities within the different areas of R&D (i.e. Products Research, Process Development, Package Development, etc.).
- Opportunities to network with P&G Researchers, Research Managers, and other top science students from other colleges.
- The opportunity to interview for a 2011 R&D Researcher internship or co-op.

## Selection Criteria:

- Current enrollment and good standing in a Chemistry, Biology, Mechanical Engineering Technology or Packaging Science program at the Associate or Bachelor degree level.
- Demonstrated lab/research experience is required.
- Leadership experience is desired.
- Technical expertise is also desired.
- Career interest in R&D at P&G is a plus.

To Apply Visit:

Click on the *Research Your Future in Science Seminar* link under the **Apply** section.

**Applications must be received by June 2010.**

"I really liked the hands on experience along with the workshops. There was a great balance between both. Also, the atmosphere created among the participants and coordinators was awesome."
