TEACHING EXPERIENCE

Psychology 605: Graduate Memory and Cognition

Psychology 601: Graduate Statistics

Psychology 210: Social Psychology

The scientific study of individuals as they affect and are affected by the real and imagined presence of others. Topics include: interpersonal attraction, attribution theory, attitudes, group dynamics, and prejudice.

Psychology 101: General Psychology I/Psychology and Society

A survey on the science of behavior of man and other animals, and psychology as a biosocial science. Topics include: psychology as a science, history of psychology, learning, personality, social psychology, psychological disorders, psychological therapies, and human sexual behavior.

Psychology 335: Research Design and Analysis

This course provides students with a basic understanding of research methodology through hands on involvement in psychological research. Students will be trained in all phases of the research process and then conducted research designed by the instructor.

Psychology 251: Group Processes

The study of group identity and influences at the social and organizational level. Topics include social identity, leadership, group dynamics, conflict, and productivity.

Psychology 220: Principles of Research Design

The principles of designing, conducting, and interpreting psychological research is surveyed with an emphasis on the critical analysis of published research and the production of an APA style research proposal.

Psychology 102: General Psychology II

A continuation of topic areas not covered in Psychology 101 including: physiology, sensation and perception, memory, thinking, intelligence, language, states of consciousness, motivation and emotion, and industrial/organizational psychology
