

**ASSESSMENT REPORT  
2015-2016**

**Computer Science**

(Instructional Degree Program)

**M.S./M.A.**

(Degree Level)

**Program Mission:**

The mission of the Media Arts and Computer Science (MACS) M.S./M.A. Program is to provide students with a challenging, market relevant and high-quality education in computer science with focused concentrations in media arts and computer science.

**Student Learning Outcome 1:**

Understand graduate level computer science and media arts terminology, technology and programming methods.

**NMHU Traits Specifically Linked to Student Learning Outcome 1**

- Mastery of Content Knowledge and Skills
- Critical and Reflective Thinking Skills
- Effective Use of Technology

**First Means of Assessment for Outcome 1:**

Final grade from CS 600: Principles of Computer Science and Media Arts: interdisciplinary investigation of terminology, roots, assumptions and principles that underlie the meaning of media arts and computer science. Students mastery will be measured with a B or better in the course.

**Summary of Data:**

Number of Students Meeting Criterion:	2	Number of Students Not Meeting Criterion:	0
Total Number of Students Assessed:	2	Percent of Students Meeting Criterion:	100%

**Second Means of Assessment for Outcome 1:**

Final grade from CS 610: Synthesis of Media Arts and Computer Science: interdisciplinary synthesis of principles that underlie the merging disciplines of computer science and media arts. Students mastery will be measured with a C or better in the course.

### Summary of Data:

Number of Students Meeting Criterion:	3	Number of Students Not Meeting Criterion:	0
Total Number of Students Assessed:	3	Percent of Students Meeting Criterion:	100%

### Third Means of Assessment for Outcome 1:

Final grade from CS 620: Multimedia Project Development; study of the processes, techniques and tools used in the development of sophisticated multimedia-based projects which are focused both the theoretical as well as practical aspects of multimedia design and advanced programming methods. Students will complete a project that combines various tools and techniques discussed in the course. Final grades will be based on successful literature reviews, research methods, and presentations. This course will allow the student to do the initial research in to their field project or thesis. Students mastery will be measured with a C or better in the course.

### Summary of Data:

Number of Students Meeting Criterion:	8	Number of Students Not Meeting Criterion:	0
Total Number of Students Assessed:	8	Percent of Students Meeting Criterion:	100%

### Interpretation of Results for Outcome 1:

*A good number of students met the integrated computer science and media arts criterion, but the number could be better. The faculty team is happy with this result and will continue to improve teaching methods to enhance and improve overall success of these interdisciplinary students in media arts and computer science.*

### Student Learning Outcome 2:

Successfully apply knowledge of advanced programming methodology to complex problems in computer science.

### NMHU Traits Specifically Linked to Student Learning Outcome 2

- Critical and Reflective Thinking Skills
- Effective Use of Technology
- Effective Communication Skills
- Mastery of Content Knowledge and Skills

### First Means of Assessment for Outcome 2:

Final defense from CS 697: Field Project evaluating current individual field research and writing in preparation of graduate field project. Students' ability to successfully accomplish the above topics in their field project will be measured by an achievement of a P in their final grade and successful presentation and defense of their field project to their committee.

**Summary of Data**

Number of Students Meeting Criterion:	0	Number of Students Not Meeting Criterion:	0
Total Number of Students Assessed:	0	Percent of Students Meeting Criterion:	0%

**Second Means of Assessment for Outcome 2:**

Final defense from CS 699: Thesis evaluating current individual field research and writing in preparation of graduate thesis. Students' ability to successfully accomplish the above topics in their thesis will be measured by an achievement of a P in their final grade and successful presentation and defense of their thesis to their committee.

**Summary of Data:**

Number of Students Meeting Criterion:	2	Number of Students Not Meeting Criterion:	0
Total Number of Students Assessed:	2	Percent of Students Meeting Criterion:	100%

**Interpretation of Results for Outcome 2:**

*A large number of the students have successfully defended either their field projects or their theses and moved on to very successful careers in their field of choice. The faculty team is very pleased with the overall success of our students. But we will continue to improve teaching methods to enhance and improve overall success of these interdisciplinary students in media arts and computer science.*

**Assessment of Center Students:**

(If your program is offered at one of the Centers please contact OIER to have an analysis conducted for those students. If this does not apply to your program you can delete this section.)

N/A

**Assessment of Online Students:**

(If your program is offered online please contact OIER to have an analysis conducted for those students. If this does not apply to your program you can delete this section.)

N/A

**Utilization of Results:**

The results of our assessments will be made available to our external advisory board and faculty. The feedback we receive regarding the results of our assessment will close the loop on our assessment system. This will allow us to apply both our internal faculty critique (internal feedback) and external advisory board critique (external feedback) to provide the proper amount and direction for growth and change in the program.
