

ASSESSMENT REPORT 2018-2019

Chemistry Graduate

(Instructional Degree Program)

M.S.

(Degree Level)

Program Mission:

The goal of the chemistry Master of Science degree program is to adequately prepare the graduate to enter the work force at the level of a M.S. graduate. It also designed to prepare students for the rigors of a more advanced Ph.D. program of study.

Student Learning Outcome 1:

NMHU Master of Science Chemistry graduates should be familiar with chemical literature and comfortable in presenting and researching relevant chemistry topics.

NMHU Traits Specifically Linked to Student Learning Outcome 1

- Mastery of Content Knowledge and Skills
- Effective Communication Skills

First Means of Assessment for Outcome 1:

Chemistry 691, a required colloquium course, is designed to evaluate the students abilities to produce papers and oral presentations based on chemical literature chosen in consultation with their research adviser. This outcome is considered met if the student earns a B or better in CHEM 691. The program goal will be considered met if the percentage of students meeting this criteria is greater than 90%.

Summary of Data:

Number of Students Meeting Criterion:	7	Number of Students Not Meeting Criterion:	0
Total Number of Students Assessed:	7	Percent of Students Meeting Criterion:	100%

Second Means of Assessment for Outcome 1:

Chemistry 671, a required course in the MS degree, involves a literature presentation designed to assess student's ability to carry out literature research and presentation of relevant background information in an area outside of their research project. This outcome is considered met if the student receives a grade of 75% or higher on this

assignment. The program goal will be considered met if the percentage of students meeting this criteria is greater than 90%.

Summary of Data:

Number of Students Meeting Criterion:	7	Number of Students Not Meeting Criterion:	0
Total Number of Students Assessed:	7	Percent of Students Meeting Criterion:	100%

Interpretation of Results for Outcome 1:

Small sample sizes mean that even small numbers of students not meeting the criteria make our thresholds difficult to meet. In our case, there was no students who did not meet the criteria, which is a good rate for this program.

Student Learning Outcome 2:

NMHU Master of Science Chemistry graduates should be able to analyze and solve a chemical problem and communicate appropriate solutions to the problem that utilize appropriate chemistry-related instrumentation.

NMHU Traits Specifically Linked to Student Learning Outcome 2

- Mastery of Content Knowledge and Skills
- Effective Communication Skills
- Effective Use of Technology

First Means of Assessment for Outcome 2:

Chemistry 555, a required course in the MS program, is a research-based course which focuses on presentation or results of students' research obtained in the labs. It includes knowledge of instrumentation and experimental problem solving. This outcome is considered met if the student earns a B or higher in CHEM 555. The program goal will be considered met if the percentage of students meeting this criteria is greater than 90%.

Summary of Data

Number of Students Meeting Criterion:	7	Number of Students Not Meeting Criterion:	0
Total Number of Students Assessed:	7	Percent of Students Meeting Criterion:	100%

Interpretation of Results for Outcome 2:

Students show proficiency in this area, demonstrating the ability of our students to analyze and perform experiments efficiently.

Student Learning Outcome 3:

NMHU Master of Science Chemistry graduates should have the opportunity and the ability to present their research outside of the department to the broader scientific community.

NMHU Traits Specifically Linked to Student Learning Outcome 3

- Mastery of Content Knowledge and Skills
- Effective Communication Skills
- Critical and Reflective Thinking Skills

First Means of Assessment for Outcome 3:

This outcome is considered met if the student presents their thesis research at venues outside of the chemistry department seminar. Examples of such venues include professional meetings, poster symposia, or invited seminars at other institutions, NMHU Research Day. The program goal will be considered met if the percentage of students meeting this criteria is greater than 75%.

Summary of Data

Number of Students Meeting Criterion:	6	Number of Students Not Meeting Criterion:	1
Total Number of Students Assessed:	7	Percent of Students Meeting Criterion:	86%

Interpretation of Results for Outcome 3:

The percentage is above threshold. However this is something in our program that might be improved since majority of students gave poster presentation at NMHU Research Day. So, we are committed to making our students aware of opportunities and encouraging them to take advantage of chances to get their research heard by a broader audience. Student who does not meet criteria is still in our program and will meet this criterion until graduation. It should be mention that 5 students who graduated from NMHU Chemistry MS program have been admitted to PhD programs at different universities.
