

Measure 2: Satisfaction of Employers and Stakeholders

Until now, we have not been keeping official track of where past graduates have been working and therefore have had no way to measure employer satisfaction of our graduates. This is a situation which has been rectified and we have begun tracking where our student take employment after graduation. We have recently been given a comprehensive list of former NMHU graduates working in public schools in the state of New Mexico by the Public Education Department. The list details where each of our former graduates work and the positions they hold. The Director of Assessment and Accreditation is currently working the relevant department heads and the Dean of the School of Education to create a new Employer Satisfaction Survey which we will be sending out to the schools and districts which employ our graduates. Moving forward this information will be gathered regularly and shared here. Once surveys have been returned to us from the schools that hired our 2020-2021 program completers, we will post the data in this space.
